

Pizza
Rita

Dear Sir or Madam:

There are few companies out there that compel me to write letters of recommendations. Professional Piping Inc. is one of those companies.

I have used Professional Piping for a number of projects involving remodels on my Pizza Shops as well as projects in my own home. As with any professional, I found their knowledge of the work to be done to be very adequate, and helpful in determining additional needs I may have in other scopes of work for the project.

The standout factor in my decision to use Professional Piping was their dedication to meeting the timeline needed to complete the jobs. Often times, many subcontractors I've used seem to place my schedule second to theirs. It is very important to me to have work done by professionals that understand the value of my time, and value me as a customer.

If you have ANY questions at all regarding Professional Piping's integrity, professionalism, or work, do not hesitate to call me.

Sincerely,

Brian Dickmann
